

750 TPH!

"Super Roo"

BunkerStacker3750

Beat your competitors with the fastest self propelled machine on the market.

With a design capacity of 750 tonnes per hour and a massive six metre long dumping target zone, you will spend more time watching the grain pile grow and less time managing trucks.

Perhaps you are spending a lot of time on the end of a shovel sorting out grain spills or consuming hours watching grain trickling from trailer bagging doors. If you aspire to be an industry leader, the KE *BunkerStacker* 3750 is the machine for your operation. Trucks will dump, go and keep coming back with more grain.

And when its time for the grain to go, add a surge hopper to the stacker and the stacker can now be used to empty the bunker it filled.

You work hard and so will your *BunkerStacker!*

Deliver peak performance to your operation year after year.

BunkerStacker3750

Design capacity: 750 TPH

Powered by a diesel Generator Set ("Genset")

FEATURES

Proven ability to handle all grains, pulses and oilseeds	●
Self-propelled and controlled from operator platform situated at Underbelly Belt Conveyor (UBB)	●
A narrow wheel to wheel footprint ensures that the machine is able to service bunkers that are tightly packed and with as little as 14 metres between them	●
Drive Over Hopper (DOH), UBB frame and Stacker modules all lock together so the machine can be operated and driven as a single unit	●
Genset powers all modules and can be configured to power a KE <i>BunkerSweeper</i> as well	●
Stacker mounted genset hydraulically slides out for easy maintenance	●
Well lit operator platforms and LED spotlights on boom for night time operation	●
All drives are electrically powered with separation of the DOH, UBB and Stacker modules made easy with plugged connections	●
Air Compressor with hose and wand on board to assist with clean up	●
Hydraulic jacks on DOH and Stacker for levelling machines	●
Fully gridded 6m DOH deck allowing "dump and go"	●
Pendant controls on Stacker	●
Sun protection and operator controls available on each side of the DOH	●
Fire extinguishers provided	●
Optional extra: Up to 12t capacity hopper fitted with slide gate valve to control the flow of product	●

Dump & Go – Drive Over Hopper

Multi-directional discharge chute to make trimming the bunker easy

Out loading via *BunkerStacker 3750* fitted with surge hopper

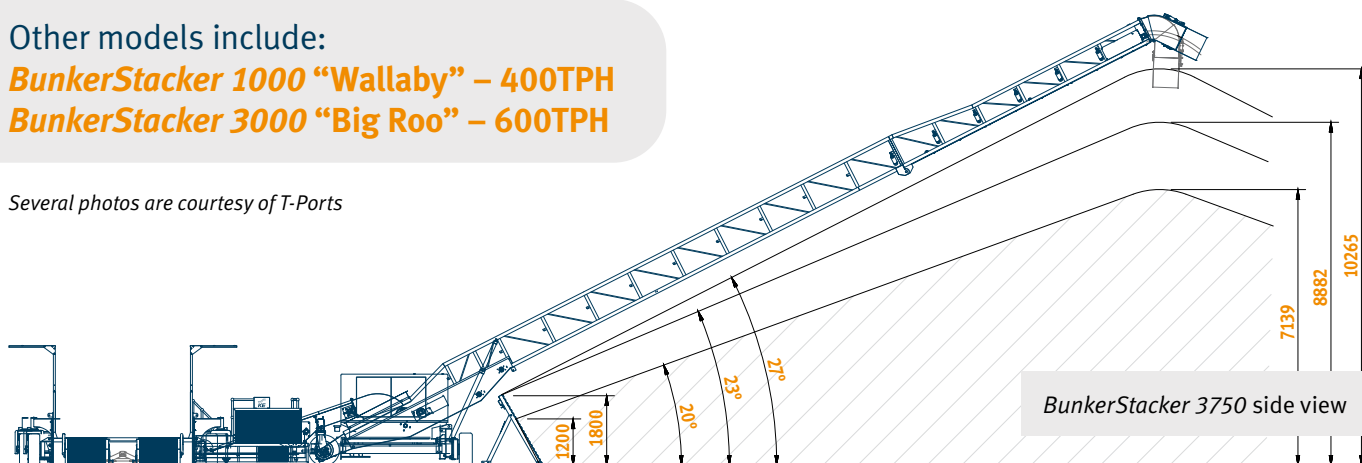

● TRUCK DUMP AND GO ● EASY TO OPERATE ● SIMPLE TO MAINTAIN

Other models include:

BunkerStacker 1000 "Wallaby" – 400TPH

BunkerStacker 3000 "Big Roo" – 600TPH
