

Grain Valves

Use

KE design and manufacture a wide range of flow-valves and diverter valves to regulate product flow through a material handling system.

Options

KE's product range includes simple hydraulic open-close gate valves, diverter valves that enable two-way allocation of product, right through to rotary distributors, the ultimate material handling component for multi-directional feed, that receive material through the top inlet and direct it through a pipe to the desired outlet.

FEATURES

- Engineered to prevent leakage
- Wear-resistant ceramic and/or poly linings fitted to high impact and wear areas
- Made to order to customer specifications
- Available with manual, electric, pneumatic and hydraulic controls/components
- Heavy duty mild steel or stainless steel construction

SIZES/SPECIFICATIONS

Capacity TPH– Wheat	Dimensions WxH (mm)
200 (or less)	300 x 300
400	450 x 450
600	500 x 500
800	550 x 550
1000	600 x 600
1200	650 x 650
1500	720 x 720

Flow Valves

Description

KE design and manufacture a wide range of flow valves to manage flow through a handling system, including gas seal valves ideal for low pressure sealing requirements.

Flow Valves

FEATURES

Manual, electric or pneumatic options

Made to customer requirements

Range from **200 tph to 1500tph**

Shut off Valves

FEATURES

Manual, electric or pneumatic options

Made to customer requirements

Range from **200 tph to 1500tph**

Gas tight Valves

FEATURES

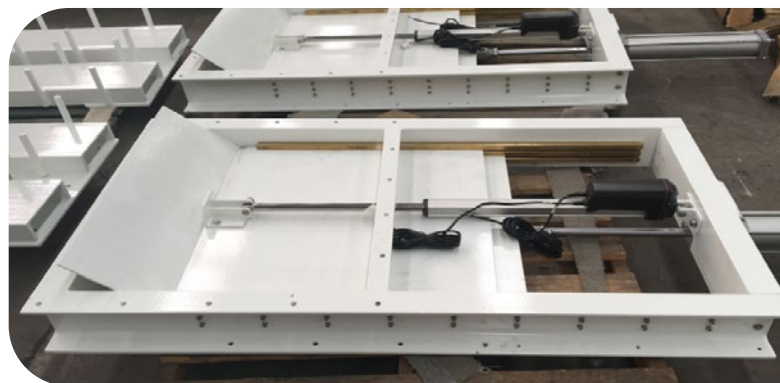

Manual, electric or pneumatic options

Different models for oversilo and undersilo operations

Gas seal to 500Pa with 15 minute half life

Made to order and can double as a flow valve, supporting a wide variety of flange connections.

Range from **200tph to 1500tph**

Diverter Valves And Distributors

Description

Diverter valves enable two or three way allocation of product through a system. Where more multi-directional flow paths are required, the rotary distributor provides the ideal solution.

Diverter Valves

FEATURES

Manual, electric or pneumatic options

Made to customer requirements

Range from **200 tph to 1500tph**

Can be lined or tiled to order

Other metering features

Rotary Distributors

FEATURES

Manual, electric or pneumatic options

Made to customer requirements with up to 5 outlet options available

Range from **200 tph to 1500tph**

Can be lined or tiled to order
