

DUMP&GO!

"Big Roo"

BunkerStacker3000

Operators and truck drivers love this machine. It's a self propelled stacker that makes unloading truck trailers and stacking product into bunkers quick and easy.

The BunkerStacker 3000 can be moved between sites on two semi-trailers

Tired of spillage and shovelling as each truck dumps? Or perhaps you are tipping slow to minimise clean up. It's time to graduate to the big league with a *Big Roo BunkerStacker*. Once the word gets out you have a KE *BunkerStacker* working on your site, grain will flow as the trucks dump and go!

And when it's time for the grain to go, add a surge hopper to the stacker and the stacker can now be used to empty the bunker it filled.

You work hard and so will your BunkerStacker!

**Need bunker loading capacity for this year's harvest?

BunkerStacker3000

Deliver peak performance to your operation year after year.

Design capacity: 600 TPH (22,000 bushels PH)

FEATURES

MODEL 3000 UBA NEW	MODEL 3000 UBB
Drive Over Hopper (DOH) utilises Underbelly Auger Conveyor (UBA)	Drive Over Hopper (DOH) utilises Underbelly Belt Conveyor (UBB)
Powered by 150 kVA Genset	Powered by 110 kVA Genset
Proven ability to handle all grains, pulses and oilseeds. Recommended for oilseeds	Proven ability to handle all grains, pulses and oilseeds
UBA Auger Conveyor features clean out door to enable regular cleaning	UBB Belt Conveyor features roll-out conveyor with open-belt design
Self-propelled and controlled from operator platform situated at Underbelly Auger Conveyor (UBA) or Underbelly Belt Conveyor (UBB)	
Drive Over Hopper (DOH), UBA or UBB frame and Stacker all lock together so entire machine can be self-propelled at once	
Genset powers all modules, floodlights, hydraulics and the on-board compressor unit	
Both UBA and UBB models have Underbelly conveyors designed in a slide-out cassette format to enable easy removal for maintenance and cleaning	
All drives are electrically powered with separation of the DOH, UBA or UBB and Stacker modules made easy with plugged connections	
Hydraulically operated lifting jacks, ramps and drive wheels make set-up and manoeuvring a one-person operation	
Stacker mounted genset hydraulically slides out for easy maintenance	
Fully gridded 6 metre DOH deck allowing trucks to “dump and go”	
Well lit operator platforms and LED spotlights on boom for night time operation	
Air compressor with hose and wand on board to assist with clean up	
Sun protection and operator controls available on each side of the DOH	
Pendant control on Stacker and fire extinguishers provided	
Multi-directional discharge chute on Stacker to make trimming easier and maximise storage capacity	
OPTIONAL EXTRA: 8 tonne capacity outload hopper fitted with slide gate valve to control the flow of product	

Dump & Go – Drive Over Hopper

Multi-directional discharge chute to make trimming the bunker or grain pile easy

Outloading via BunkerStacker 3000 fitted with surge hopper

- EASY TO OPERATE • SAFE
- QUICK TO SET UP
- SIMPLE TO MAINTAIN
- TRUCK DUMP & GO
