

RECLAIMEASY!

BunkerSweeper750

The *BunkerSweeper750* is designed to make reclaiming grain from your temporary storage or shed, into trucks quick and easy.

The “self-propelled” *BunkerSweeper750* is perfect for grain distributors and handlers.

The *BunkerSweeper750* is quick and easy to transport. Essential design elements make the unit safe and easy for one person to operate.

The *BunkerSweeper750* has a design capacity of 750 TPH (28,000 bushels) and can be used to direct feed into trucks or directly onto feed conveyors giving it great versatility.

Kilic Engineering (KE) has been designing and building material handling equipment for the grain industry for over 50 years.

BunkerSweeper750

Self-propelled Temporary Storage Reclaimer

Capacity: 750 TPH (28,000 bushels)

Self-propelled (hydraulic drives)

FEATURES

- Suitable for all grains including pulses, cereals and oilseeds
- Aggressive at the pile, reclaiming all product grades
- Design capacity 750 TPH (28,000 bushels) @800kg/m³ free-flowing wheat
- Self-propelled (hydraulic drives)
- Swing conveyor gives multi directional outload feed
- Sweep paddle design assists in breaking up clumpy product
- Height adjustable to allow for various ground levels
- Solid-fill tyres providing good stability and traction
- Hydraulic steering
- Easy drive on and drive off loading for transit
- Towing mode can be used to facilitate quick on-site movements

BENEFITS

- Reduces operational costs
- Single person operation using wireless remote control
- Easy to manoeuvre
- Guarded and safe
- Multiple out loading options
 - Direct into truck
 - Direct into feed conveyor system if required
- Multi-purpose
 - Reclaim from temporary storage
 - Reclaim from flat storage buildings
- Easy transport between sites with no requirement for escort/pilot vehicles in most jurisdictions

Drive-on, drive-off: Complete unit on a truck

Combined with *BunkerStacker*

Wireless remote with camera feed from discharge chute to screen

KE BunkerSweeper750 with onboard generator
